

AYR SALINE NASAL MIST

DIRECTIONS

To spray, hold bottle upright and give short, firm squeezes in each nostril as often as needed. For nose drops, hold bottle upside down.

USES

Ayr Mist is a soothing, non-irritating saline solution physiologically compatible with nasal membranes. Ayr Mist restores important moisture to provide relief for dry, crusty and inflamed nasal membranes due to central heating, low humidity environments, or colds and the overuse of nasal decongestant drops or sprays (rebound congestion). Ayr Mist avoids the side effects of decongestant drops or sprays.

PRECAUTIONS

Take care not to aspirate nasal contents back into bottle. If spray tip touches nose, rinse with hot water before replacing cap. Use of bottle by more than one person may spread infection.
