

🌀 *Dry&Clean* Mode (2 h)

The *Dry&Clean* mode is an automatic program and combines fast drying by an efficient air blower with UV-C light at the beginning and end of the drying time for perfect hygiene.

Clean Mode (2 min) ☀️

The *Clean* Mode is a short-term hygiene program and starts the optimized UV-C light, which effectively eliminates up to 99.9 % of germs, bacteria and fungi in the household.

Multiple utility

With the new dry-cap uv 2®, a large number of other products can be quickly dried and hygienically cleansed in addition to rechargeable hearing aids. Here are a few examples from the fields of electronics, dental care, babies and children, cosmetics, valuables and much more...

dry-cap uv 2®

Electronic drying cap for all rechargeable hearing aids.

- Perfect fast drying by air blower
- Hygienic cleansing by UV-C light
- Simultaneous drying and charging by dual USB power supply

Dries and maintains your hearing aids while charging

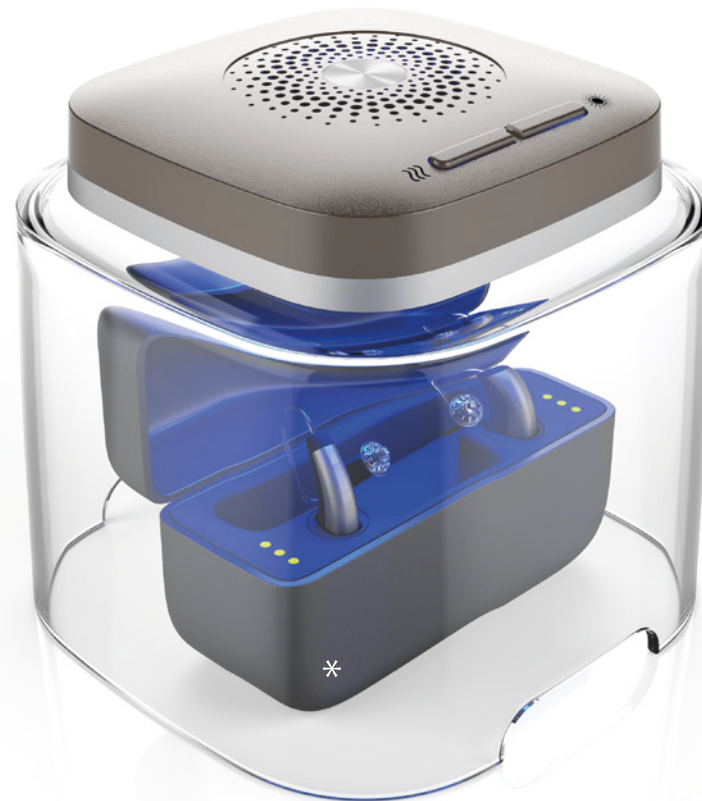

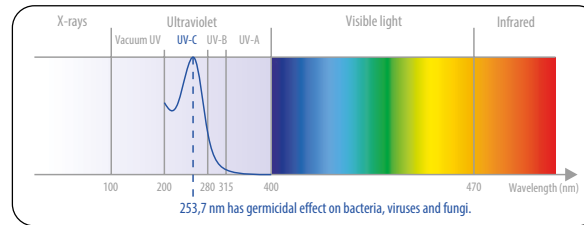

Moisture, body secretions and cerumen can severely impair the function of rechargeable hearing aids and lead to failure.

The new dry-cap uv 2® offers optimum care. Fast drying by an efficient air blower significantly extends the service life and reduces repairs.

Ultraviolet light (253.7 nm UV-C) eliminates 99.9% of bacteria, fungi and viruses. Additional blue light is health-improving.

This clinical cleanliness prevents ear infections and protects both your hearing aids and your health. A 3G sensor shuts off the device to protect the eyes when moving.

The Dual-USB power supply allows you to dry, hygienically clean and charge rechargeable hearing aids or other devices (e. g. mobile phones) at the same time from a single power outlet.

* Suitable for all hearing aid and earphone chargers

The new dry-cap uv 2® is a good choice

The patented dry-cap uv 2® as a cap enables drying, hygienic cleansing and charging of rechargeable hearing aids at the same time at only one socket.

Two modes are available to cover a wide range of different applications in the fields of electronics, dental care, babies and children, cosmetics, valuables, etc.

The **Dry&Clean** mode combines fast drying by an efficient air blower and UV-C light for perfect hygiene at the beginning and end of the drying process.

The **Clean** Mode starts the UV-C light in order to achieve a fast hygiene even with multiple applications.

Whether at home or on the move, the device works on a 5V-USB-basis and can be used in hotels, cars, PCs, TVs or audio devices. A standard USB 2.0 port is sufficient for this.

The new dry-cap uv 2® is energy-saving, cost-effective in operation and offers safety in application. Effective and absolutely gentle care is the best guarantee for a long hearing system life.

Your specialist

Fast drying by efficient air flow blower

Hygienic cleansing by UV-C light for your health

Health improving blue light

Easy handling by simple touch on tactile buttons

Drying, cleansing and charging by Dual-USB standard

Gravity sensor for safety shut-off

Automatic turn-off after 2 hours

All features controlled by microprocessor

Highest product quality with 2 year warranty

Energy-efficient, gentle and absolutely safe
