

O SCOPE™

HEAD-WORN MICROSCOPE WITH
LED ILLUMINATION
FOR AUDIOLOGISTS

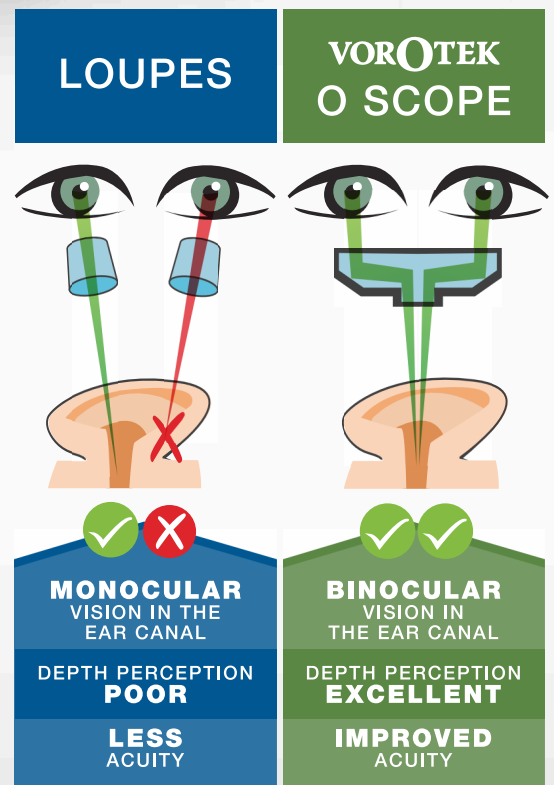

SEE WHAT YOU'VE BEEN MISSING.

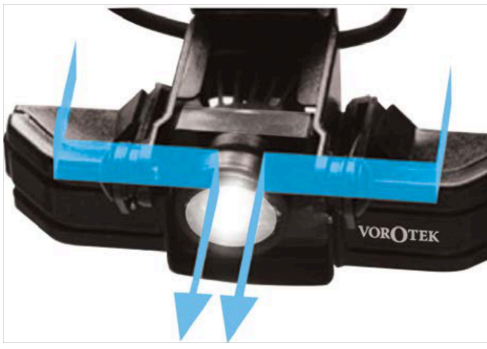

The Vorotek O Scope™ allows audiologists to achieve accurate depth perception in the ear canal, allowing both eyes to work together naturally — making clinical procedures safer, easier, and quicker.

- BRILLIANT LED ILLUMINATION
- HANDS-FREE
- PORTABLE

Ideal for:
CERUMEN REMOVAL
DEEP CANAL FITTINGS
DOME REMOVAL
EAR MOLDS

VOROTEK

O SCOPE™ | HEAD-WORN MICROSCOPE WITH LED ILLUMINATION FOR AUDIOLOGISTS

3-DIOPTER CONVERGED BINOCULAR OPTICS

Allows both eyes to work together naturally for accurate and immersive view of the ear canal, making cerumen removal faster and easier for user and patient.

FULLY ADJUSTABLE INTERPUPILLARY DISTANCE

Adjustable tabs on either side of binoculars can be pushed in or out for each user's unique IPD.

LED ILLUMINATION

High-power, 55,000 LUX illumination provides pure white, shadow-free illumination of the cavity. Fully integrated design ensures that the converged binoculars and illumination stay precisely aligned. Works with binoculars in the up or down position.

CONVENIENT FLIP-UP ACTION

Binoculars can be rotated in and out of use, allowing user to comfortably talk to patients without ever having to remove the O Scope.

PORTABLE POWER SUPPLY

Lithium-ion battery pack provides 10 hours of use and fully charges in 4 hours. Either belt or pocket worn.

TWO ERGONOMIC O SCOPE™ MODELS

SpecFrame

Fully adjustable to match the user's interpupillary distance. Can be fitted with the user's prescription lenses. Ideal for individual use.

HeadBand

Fully adjustable to head size and user's interpupillary distance. Can be worn over prescription lenses. Ideal for shared use.
